

**WASTE CONTROL
SPECIALISTS LLC**

October 24, 2008

Recommendation Letter

To Whom It May Concern:

Waste Control Specialists LLC ("WCS") owns and operates a hazardous and radioactive waste facility in west Texas (see www.wcstexas.com for more information about our company). Due to our remote location and longer distances from our customers, rail transportation is the most economical transportation method we have. WCS was first introduced to Tealinc in 2004 and we have continued to work with them since that time.

Tealinc advised WCS on rail improvements and upgrades that resulted in the award of a cleanup contract with General Electric Co. for the disposal of PCB sediments dredged from the Upper Hudson River in New York State. Tealinc was a trusted advisor to WCS from the initial proposal submittal in 2004 through the contract award in 2007 and they continue to assist us today as the rail improvements are being constructed.

Tealinc's knowledge of the industry and equipment is a great benefit to WCS and allows us to provide robust, economical transportation solutions to our customers. There are a lot of consultants to choose from with a variety of experience, but WCS is glad that we selected Tealinc as our rail improvement advisor.

Sincerely,

Rodney A. Baltzer
President
