RE: Letter of Recommendation

I would like to take this opportunity to recommend Tealinc, Ltd. to any customer that would need to lease or purchase railcars. Recently I worked with Julie Mink to facilitate an on-site inspection of 46 coal hopper cars at Western Sugar plant at Fort Morgan, Colorado. A total of 90 cars will move aggregate between

Laurentian Aggregate near Virginia, MN. to a site in North Dakota. I was very impressed with Julie and her personal attention to detail, her railroad knowledge and expertise. Julie was very personal to work with and I would highly recommend her and the company she represents for any of your railcar or operational needs.
